A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 26, 2006 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 and 10-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hierung. Hierung teaches an insert (Fig. 1) comprising: a frame (25, 32-35) forming/enclosing different sized chambers having a first side (25) with an attachment device (28), having a second side (32,34,35) with indentations(inner ends of 32,35) /thick webs (34) formed therein, an open bottom (see portion/space in Fig. 2) and a third side (33). The second side is flexible enough to have been bent into the third sides and to form the indentations. Also provided is a door storage body (19). Please note that limitations found in intended use/"for" statements have been given no weight in the claims.

Allowable Subject Matter

Claims 9 and 13-16 are allowed. (For claim 13, the prior art fails to teach an insert comprising a frame enclosing two chambers and having a first side with an attachment device, a second side with at least one indentation formed therein, and a web separating the two chambers from one another. The web is connected to only one of the first and second sides. The unconnected end of the web being brought into contact with the unconnected side by reversible elastic deformation of the frame.)

Response to Arguments

Applicant's arguments filed April 26, 2006 have been fully considered but they are not persuasive.

Addressing the arguments concerning Hiering: the examiner contends that Hiering teaches the limitations of the insert as positively claimed, e.g. the notches on the ends of members 32 show indentations (see at 34), the flanges on member 32,35 show webs (see at 34) and the frame is flexible enough to have been bent into the third sides and to form the indentations (Note: Hiering does not state that his metal structure has no flexibility as stated in the arguments.). The fact that these features look different from/are made different from that of applicant's features is irrelevant; Hiering's insert features read over the limitations in the claims as they are presently worded. Also, the fact that the insert of Hiering is not part of a refrigerator is also irrelevant since no refrigerator is being claimed. Furthermore, as noted above, limitations found in

intended use/"for" statements have been given no weight in the claims. Finally, it should be noted that the insert of Hiering is attached to a door of a container.

All claims are drawn to the same invention claimed in the application prior to the entry of the submission under 37 CFR 1.114 and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the application prior to entry under 37 CFR 1.114. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action after the filing of a request for continued examination and the submission under 37 CFR 1.114. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
